Internal, deliberative

Hi Kimberly, thanks for looping me in.

Rhina, I think Diana Saenz is leading the call today with Clarke. It's not on my calendar, but Questions 2 and 3 might be addressed in the meeting. I don't know what information will be shareable at this point.

Pesticide labels contain storage and disposal statements – a question is whether the disposal method would differ if potentially contaminated with PFAS.

Best,
Catherine

Lara,

I don't know the answers to these. See my thoughts below on who might be able to help answer. Sorry I can't help further.

Kimberly Nesci, Director
Biological and Economic Analysis Division (BEAD)
Office of Pesticide Programs
Office of Chemical Safety and Pollution Prevention

Subject: Clarke Call Today

Hi Kimberly,

I am aware that there is a small call with Clarke today, but I am not sure who is in that meeting. Do you happen to know? I just got this on calendar today – please feel free to check calendar.

We have a few clarifying questions that we are hoping to get answers to during this meeting. In particular:

1. Which states use Anvil? We know it is at least 26 states, but we'd like to know specifics for notification purposes. I don't know this. We may be able to get the information from the state call that's supposed to be happening through Kaitlin's group.
2. What is Clarke planning to advise their clients? I don't know. This is probably a question for Clarke. Are we coordinating with Clarke on our messaging? If not, we may want to refer that question to Clarke.
3. What can we advise the public about use and disposal of their current Anvil supply? I don't know. This seems to be a hazard-based question, which makes me think that perhaps OPPT should be involved in the answer? Catherine/RD, any thoughts on this?

Best,
Rhina M. Lara (*she/her/hers*)
